

Interchange Amendment Removal Phone Script

Good afternoon,

I am calling today to express my concerns on the affect that the interchange amendment will have on my credit union. The current interchange system allows my credit union to provide competitive and member-friendly debit card services to myself and other members. Reducing interchange is no guarantee that the merchants will pass the savings on to me, the consumer. It's the big box stores who will get a windfall from the reduced interchange rate. **Please vote to remove the interchange amendment from the final financial reform bill.**

Thank you for your time.
